About me

DevOps and Infrastructure Engineer with 3+ years of professional experience across enterprise network operations, Linux infrastructure, application delivery, and hands-on DevOps practices. Currently supporting 10+ business-critical applications and on-premise platforms, with experience in Proxmox, Docker, GitLab CI/CD, Nginx/Apache, Prometheus, Grafana, Loki, Alloy, Blackbox Exporter, Restic, Ansible, monitoring, backup operations, and incident response. Strong software engineering foundation in Go, Python, TypeScript/Node.js, PHP/Laravel, and SQL, enabling effective collaboration with development teams from build through production operations.

Work Experience

IT Infra Specialist | Indonesian Oil Palm Plantations Fund Management Agency 2026.01 – Now

- Operate and support on-premise infrastructure and platform services for 10+ business-critical applications, covering Linux servers, Proxmox virtual machines, application availability, capacity checks, and incident response.
- Administer GitLab and GitLab Runner environments to support source-code management, access control, CI/CD workflows, application deployment, and coordination with internal developers and external vendors.
- Configure and troubleshoot application environments involving Docker, Nginx, Apache, PM2, systemd services, domains, reverse proxies, application logs, and production connectivity.
- Implement and validate backup and recovery workflows for application files and MySQL databases using Restic, including scheduled snapshots, retention policies, restore testing, and recovery documentation.

Network Engineer | PT. Mastersystem Infotama Tbk 2023.10 – 2026.01

- Troubleshooting SD-WAN and I-WAN incidents and documented network designs, improvements, and migration activities for PT Bank Central Asia Tbk, contributing to higher team productivity and client satisfaction.
- Supported nationwide branch operations across 1,000+ sites by maintaining Cisco devices, managing IP addressing and Windows environments, and coordinating with telecommunications providers to stabilize services.
- Operated enterprise infrastructure involving Cisco ACI, APIC policies, Nexus switching, Cisco UCS, and VMware ESXi under controlled change and capacity-management processes.

Mentor and Advisor in Independent Study | PT. Presentologics (Dicoding) 2023.07 – 2024.06

- Mentored 30 students in Docker, Kubernetes, full-stack development, deployment fundamentals, and project troubleshooting, contributing to an 85% completion rate.
- Communicated technical concepts, reviewed student implementations, and supported distributed learners through project and deployment issues

Backend Developer | PT. Nusabot Inovasi Teknologi 2022.09 – 2022.12

- Maintained and enhanced Laravel-based backend features, collaborated with frontend developers on page and API integration, and supported delivery of more than seven platform pages.
- Optimized database queries and data structures to improve application performance and data integrity.

Selected Devops Projects

Production Monitoring & Alerting Platform | BPDP 2026

- Built VM and application dashboards for availability, resource utilization, HTTP status, service health, and centralized logs using Prometheus, Grafana, Loki, Alloy, Node Exporter, and Blackbox Exporter
- Configured application probes, log pipelines, Grafana alert rules, and notification delivery while tuning noisy alerts and documenting onboarding and troubleshooting procedures.

Centralized Restic Backup & SYSmon Reporting | BPDP 2026

- Automated database dumps and application-file synchronization from target servers to centralized staging using SSH, rsync, shell scripts, and scheduled cron jobs.
- Created Restic snapshot workflows with dataset tagging, status/diff/size/duration JSON output, and a multi-source monitoring view in SYSmon for daily operational checks.

igoPDF Internal Platform | BPDP ([Link Website](#)) 2026

- Customized and deployed a privacy-first internal PDF platform using TypeScript, Node.js/Express, PostgreSQL, Docker, and Nginx for secure organizational document processing.
- Implemented internal authentication, Active Directory/LDAP integration, session security, CAPTCHA, role-based access control, automatic user provisioning, and administrative user management.
- Added usage reporting and operational configuration while retaining client-side PDF processing to reduce exposure of internal documents to third-party services.

MSI Network Automation Platform | PT. Mastersystem Infotama Tbk. 2025 - 2026

- Developed a network automation platform using React, TypeScript, Prisma, Python, and Ansible to provide controlled web-based execution of network operations.
- Containerized the platform with Docker and implemented GitHub Actions, health checks, deployment scripts, rollback procedures, and technical documentation.

MyGram Backend API | Hacktiv8 ([Link Website](#)) 2024-2025

- Built a REST API using Go, Gin, PostgreSQL, GORM, and JWT authentication, covering users, photos, comments, social links, authorization, and request validation..
- Structured the service for containerized development and deployment using Docker and environment-based configuration.

Containerized Chat Service | Jember University 2023

- Developed and deployed a Socket.IO chat service using Docker and Kubernetes on a VPS, separating the service from the primary website and improving deployment scalability

Education and Certification

Bachelor of Computer Science | University Of Jember | GPA 3.77 2023

- **Certification:** Architecting on AWS by Dicoding Indonesia (2023–2026), AWS Academy Graduate – AWS Academy Cloud Foundations (2023), Alibaba Cloud Certified Developer (2024–2026), Build Microservices Architecture by Dicoding Indonesia (2023–2026), Scalable Web Service with Golang by Hacktiv8 Indonesia (2023), Cisco CyberOps Associate (2022), Cisco Certified Network Associate (2021–2024)

Skills & abilities

- **Infrastructure & Operating Systems:** Linux, Proxmox, VMware ESXi, Windows Server, Active Directory, TCP/IP, DNS, SSL/TLS, reverse proxy.
- **Containers & Web Servers:** Docker, Docker Compose, Kubernetes, Nginx, PM2, Coolify, Portainer
- **CI/CD & Automation:** GitLab CI/CD, GitHub Actions, Jenkins, Ansible, Terraform, Bash, Python
- **Monitoring & Logging:** Prometheus, Grafana, Loki, Alloy, Blackbox Exporter, Node Exporter, Zabbix
- **Backup & Operations :** Restic, rsync, MySQL/MariaDB backup, incident response, log analysis, runbooks, deployment rollback
- **Cloud & Development:** WS, GCP, Azure, Alibaba Cloud; Go/Gin, TypeScript/Node.js, JavaScript/React, PHP/Laravel, SQL
