About me

DevOps Engineer with hands-on experience building secure, scalable applications and the infrastructure behind them. Proficient with Docker, Kubernetes, Terraform, and Ansible for containerization, orchestration, and IaC; skilled in CI/CD using GitLab and Jenkins; and comfortable across AWS and GCP. Strong foundation in network engineering and modern web development, with practical experience in PHP, JavaScript, and Go for building responsive interfaces, integrating databases, and delivering reliable services end-to-end.

Work Experience

IT Infra Specialist | Indonesian Oil Palm Plantations Fund Management Agency **2026.01 – Now**

- Managed on-prem infrastructure and platform operations for 10+ business-critical web applications and enterprise systems, ensuring service availability, server readiness, performance checks, and incident response..
- Administered Proxmox virtualization for VM provisioning, resource allocation, template management, lifecycle operations, and troubleshooting across application and infrastructure workloads.
- Deployed and maintained GitLab to support CI/CD workflows, including runner setup, access control, project structure, deployment processes, and coordination with internal teams and external vendors.

Network Engineer | PT. Mastersystem Infotama Tbk **2023.10 – 2026.01**

- Elevated team productivity by 25% and achieved 95% client satisfaction by efficiently troubleshooting SD-WAN/I-WAN issues and thoroughly documenting network designs, improvements, and migration projects for PT. Bank Central Asia Tbk.
- Supported nationwide branch operations (1000+ sites): maintained Cisco devices, managed IP addressing and Windows environments, and coordinated with telco teams to stabilize services.
- Operate Cisco ACI fabrics: APIC policy/tenant configuration (VRFs/BDs/contracts), Nexus switching, and Cisco UCS/VMware ESXi clusters under change control and capacity plans.

Mentor and Advisor in Independent Study | PT. Presentologics (Dicoding) **2023.07 – 2024.06**

- Guided 30 students in fullstack website development during independent study, providing expertise and support to enhance their understanding and skills..
- Guided students in DevOps (Docker and Kubernetes) during independent study, ensuring they successfully navigate their batch requirements, leading to an 85% completion rate.
- Helped students improve their front-end development abilities, focusing on React and JavaScript Webpack, ensuring 90% of participants were prepared for their final projects and challenges.

Backend Developer | PT. Nusabot Inovasi Teknologi **2022.09 – 2022.12**

- Collaborated with frontend developers to successfully integrate over 7 distinct pages into the platform's backend, resulting in a 20% improvement in user engagement.
- Conducted database optimizations and modifications, improving query performance by 15% and enhancing data integrity.
- Maintaining and enhancing features on the Nusabot.id platform, built on the Laravel framework.

Freelance Project Experience

Fullstack Developer (Contract) | MSI Automation Website ([Github Link](#)) **2024.05-2024.07**

Develop a Network Automation Platform using Ansible at PT. Mastersystem Infotama Tbk.

- Designed and implemented a network automation platform using React, Prisma, and Ansible. Utilized Docker for containerization and GitHub Actions for continuous integration and deployment (CI/CD), ensuring easy maintenance and scalability. Improving data accessibility by 35%.

Frontend Developer (Contract) | Calendar MSI Platform ([Github Link](#)) **2024.05-2024.07**

Develop a Calendar Platform for Event Management at PT. Mastersystem Infotama Tbk.

- Designed and implemented a calendar platform using React and Google Calendar API, enhancing event management with a custom form and data export features, increasing user engagement by 25% and improving data accessibility by 35%.

Full Stack Developer (Contract) | PT. Presentologics (Dicoding Indonesia) **2021.03-2022.12**

Develop Platform Plasma Donors COVID-19 for Final Project Submission at Dicoding

- Developed a platform for connecting COVID-19 patients with plasma donors using Laravel 8 and Stisla CMS, optimizing CRUD functionalities and deploying on Heroku to ensure high performance and availability.

Full Stack Programmer (Contract) | Jember University **2021.01-2021.08**

Developed Chat Services for Kayumas Website using Docker Kubernetes

- Developed and deployed chat services for Kayumas website using Socket.IO, Docker, and Kubernetes, managing containerized deployment on a VPS for enhanced scalability and separation from the main website.

Education

University of Jember **2023**

Major: **Computer Science** | Minor: **Technology Information**

- GPA 3.77
- Multimedia Staff | Kominfo Division | Student Activity Units Linux and Open Source **2020**
- Assistant Lecturer | Teaching Division | Network Lab **2020**
- KUKM Staff | KUKM Division | Student Executive Board **2020**
- Head Division | Household Division | Student Executive Board **2021**

Additional

- **Certification:** Alibaba Cloud Certified Developer (2024 – 2026), Scalable Web Service with Golang by PT. Hacktivate Teknologi Indonesia (2023), Build Microservices Architecture by PT Presentologics Dicoding (2023 - 2026), Architecting on AWS by PT Presentologics Dicoding (2023 - 2026), Become a Front-End Web Developer Expert by PT Presentologics Dicoding (2021 - 2024), Building Web with Laravel 8 by Camp404 (2021), Fullstack JavaScript Web Development with MERN Stack by Camp404 (2021), HTML5 Application Development Fundamentals by Microsoft (2021), CyberOps Associate (2022), Cisco Certification Network Associate (2021-2024), MikroTik Certified Network Associate (2019-2022), AWS Academy Graduate - AWS Academy Cloud Foundations (2023)
- **Awards:** 3rd place in Smart City Category on TIC Faculty Competition (2020), 4th place in Smart City Category on ISIC Faculty Competition (2020)
- **Committee:** Chairman Committee at Friendship Competition (2021)

Skills & abilities

- **Programming Languages:** PHP (Expert), SQL (Intermediate), React (Intermediate), Python (Expert), Go (Intermediate), JavaScript (Expert), and Flutter (Intermediate).
- **DevOps Tools:** Expertise in Docker, Kubernetes, Ansible, Terraform, RabbitMQ, Jenkins, Prometheus, and Grafana for containerization, orchestration, and monitoring.
- **Software Development:** Proficient in full-stack development, specializing in system architecture design from monolithic to microservices.
- **Soft Skills:** Strong problem-solving abilities, effective time management, excellent communication skills, and proven leadership experience.
